The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/593,989	Applicant(s) ROBBEN ET AL.	
	Examiner leszek b. kiliman	Art Unit 1794	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO'934 and what is known in the art.

The applied WO'934 reference teaches that it is well known in the art to make and use a layer that comprises a high amylose starch derivative with amylose content within the claimed range and wherein amylose is alkylene oxide modified. See page 1, lines 15-30, Summary of the invention, page 4, lines 5-26, The prior art does not specifically teach that the substrate is coated with high amylose layer and that the specific alkylene oxide is used. However, it is well known in the art that biodegradable layer may be placed upon the substrate. See applicants disclosure page 1, lines 20-21. It would have been obvious to one having ordinary skill in the art at the time of the invention to place amylose layer upon the substrate since such would improve the mechanical properties and repelled liquids. Also, it would have been obvious to optimize

degree of derivatization with alkylene oxide used for modification of amylose (please note that the WO'934 reference teaches C2 to C6 alkylene oxide used for modification).
